DATE: June 11, 2019
TIME: 11:00 am – 12:00 pm (ET)
PLACE: Roybal Campus, Global Communications Center (Building 19), Room 116 or Remotely via Adobe Connect: https://virtualsepd.adobeconnect.com/llsce/ or Audio bridge line: 877.931.3262, participant code: 48580179

Applicant Information Session for the LLS Class of 2020

Are you a PhD scientist interested in becoming a future laboratory leader? Or do you have a quality candidate in mind for this fellowship?

CDC’s Laboratory Leadership Service (LLS) invites interested applicants to attend an information session about the fellowship. Please share this invitation with public health colleagues, specifically PhD scientists interested in beginning assignments in July 2020.

This session will:

- provide an overview of the two-year experiential service fellowship
- cover the application process and timeline
- allow opportunities to meet program staff
- include time for questions and answers

About the LLS Program

LLS provides PhD scientists with training in laboratory science and quality management, biosafety, and leadership. LLS fellows are assigned to work in CDC, state and local public health laboratories and serve the agency and its partners by providing creative and effective approaches to real world public health laboratory issues.

During the two-year experiential learning program, LLS fellows provide on-the-job service to CDC and state and local public health laboratories. LLS fellows are guided by a comprehensive curriculum and learn through field experiences and domestic or international emergency responses. Eligible applicants are scientists who hold a doctoral-level degree in a laboratory-related discipline and have two years of post-graduate laboratory experience. The application period is open now through June 27, 2019.
